## Skills

**Languages:** C/C++, Python, JavaScript, SQL

**Technologies & Tools:** HTML, CSS, Bootstrap, Tailwind CSS, ReactJS, Next.js, Node.js, MongoDB, Express.js, Redux Toolkit, Git, GitHub, WordPress, APIs, Data Structure and Algorithms(DSA), DBMS, Big Data Analytics, Machine Learning, Deep Learning, Natural Language Processing (NLP), LLMs, Neural Networks.

## Education

**IIIT Gwalior**

Aug 2023 - Present

M.Tech in Computer Science and Engineering

**CGPA: 8.87/10**

Relevant Coursework: Implementation Techniques of Algorithms, Computer Networks and Security, Fundamentals of Cryptography, Big Data, Machine Learning, Deep Learning, Software System Design

## Work Experience

**Zidio Development, Remote**

April 2025 - Present

**Web developer, MERN Stack**

- Developed responsive, interactive UIs using React.js, Tailwind CSS, Redux Toolkit, improving user engagement by 30% through dynamic dashboards and data visualizations.
- Built and maintained RESTful APIs using Node.js, Express.js, and MongoDB, reducing data retrieval time by 40% and improving backend reliability.
- Implemented file upload and data processing features using Multer and Sheet.js, enhancing operational efficiency and automating manual workflows by 50%.
- Collaborated in a team of 5 developers using Git/GitHub and Postman for version control and API testing, with integration of OpenAI APIs to generate smart content summaries, reducing content generation time by 60%.

## Project Work

- **Hire Hive:** Built a full-stack job portal using React.js, Node.js, Express.js, and MongoDB, featuring role-based authentication for job seekers and recruiters. Managed 100+ job postings and 1,000+ applications with 5+ API endpoints. Leveraged Redux Toolkit for real-time updates and integrated Cloudinary for file uploads. Redux, Axios, Tailwind CSS, Framer Motion, Vite, Render. [Project Link](#)
- **Smart Task Manager:** Designed a full-stack task management web app enabling users to efficiently create, update, delete, and categorize tasks. Features a timeline view to visualize 100+ tasks across different timeframes per assignee, supports real-time updates with 99% uptime, and ensures a seamless experience with mobile-first responsive design. Reduced task retrieval time by 40% using optimized API calls. React (Next.js), Tailwind CSS, Zustand, Node.js, Express.js, MongoDB. [Project Link](#)
- **Fake News Detection:** Designed and developed a robust fake news detection system using 6,000+ posts and 14 features collected from Threads, annotated by cross-referencing 10+ trusted fact-checking platforms. Addressed class imbalance using LLM-generated synthetic data and extracted sentence-level semantics with SBERT embeddings. Trained and evaluated 5+ ML models, achieving 91.22% accuracy with XGBoost. Integrated metadata, sentiment, and engagement features to conduct deep analysis of bot-like behavior and misinformation spread patterns. This work has been submitted to IEEE Transactions; code and dataset will be made public upon acceptance. Tools & Tech: Python, BeautifulSoup, Selenium, Machine Learning, SBERT, LLM, Matplotlib, Pandas. [Project Link](#)

## Achievements and Certificates

- Qualified **GATE-2023 (CSE)**.
- HackerRank Badges: Gold (C++, SQL), Silver (Problem Solving, Python).
- Certifications: Fundamentals of C++ (Coding Ninjas), Web Development (Udemy), Programming with Python (Internshala), Web Development Intern (Designing World).

## Extra-Curricular

- Volunteered at International Conference CVMI-2023.
- Submitted a paper on "Empowering DDoS Resilience: Machine Learning Strategies for Enhanced Cybersecurity" to Springer Journal.
